

Produce Quality Specialist

About Fulfil: Fulfil is an ecommerce grocery platform that focuses on providing the highest quality products to the consumer at brick & mortar costs with incredibly fast delivery. A technology company at heart, we are bringing solutions to the market that have never existed before and will transform the grocery industry. With Fulfil's solutions, a revolution is coming to the way people buy groceries. A venture backed startup in the heart of Silicon Valley, we are focused on making fresh, high-quality produce affordable and accessible while reducing waste and promoting healthy lives.

Location: Menlo Park, CA

Job Description: The Produce Quality Specialist will primarily be focused on research and development for a produce quality control system. Your job will be to research produce types, defining quality attributes, ripeness and degradations markers, and lifecycle models. You will work closely with the computer science and vision systems engineering team to develop the models. Once the product is released you will monitor product quality and customer feedback in order to further improve and optimize the quality analysis and modeling system.

Required Qualifications:

- Bachelor's degree
- Knowledge of postharvest fruit and vegetable practices
- Data analysis skills and experience
- Ability to write and carry out testing plans
- Ability to self-manage projects and deadlines
- Strong communication skills
- Interest and skills related to technology

Desired Qualifications:

- Software coding experience
- Knowledge of ecommerce fulfillment
- Experience with customer interactions
