**APRIL 9-12, 2019**

**Hastings Reserve,  
Monterey County**

**Description:** This workshop will provide an overview of UAS technology, regulations and image analysis in support of drone applications. Participants with little to no experience in UAS technology will gain practice conducting flight operations, as well as hands-on experience on practical post processing.

An optional Mentored Research Project takes place April 12-13, and will allow participants to practice what they've learned through a project designed by David Bird, renowned ornithologist and Editor of *The Journal of Unmanned Vehicle Systems*.
