Richard J. Benson, County Administrative Officer

It is my pleasure to submit the 2013 Agricultural Crop and Livestock Report for Mariposa County.

This annual publication contains statistical information pertaining to acreage, yield, and gross value of Mariposa County agricultural production in accordance with Sections 2272 and 2279 of the California Food and Agricultural Code.

Mariposa County agriculture began to show the effects of the state-wide drought in 2013, particularly on the livestock industry. While Mariposa County's total estimated agricultural production was valued at \$33,305,000, there was an overall decrease of over \$1 million or approximately 2.9% from last year. However, the agricultural production value does continue to show the economic importance and the <u>real</u> impact that agricultural production has on the local and regional economy. The contribution of agriculture to the economy of Mariposa County is not totally reflected in the values contained in this report. Goods, services, transportation, processing, marketing, employment and other farm-related services significantly multiply these values to benefit the local economy and the surrounding areas.

Cattle and calves continue to be the county's leading agricultural commodity with a value of \$20,489,000, despite a 7.8% decrease in value from 2012 due to the impacts of the drought which resulted in fewer head sold and lighter weights of gain for both the cow-calf and stocker operations. Rangeland was again second with a value of \$5,826,000, despite the loss of rangeland forage production due to drought conditions. Miscellaneous livestock and poultry products followed with a value of \$2,272,000.

I must stress that these are gross values only, whether marketed or not, and *do not* in any manner represent or reflect net income or loss to the producers. Costs of production and marketing continue to influence net returns and profit. This report does not reflect upon individual operations since *the county* is the smallest unit measured for any particular commodity.

I sincerely appreciate the cooperation and assistance of the many agricultural producers, stakeholders, and public agencies that made this report possible, especially those providing data used in the compilation of this report.

Respectfully Submitted,

Cathi Boze

Agricultural Commissioner/Sealer

Annual Sustainable Agriculture Report

PEST DETECTION:

The following insect detection traps are placed throughout Mariposa County during the trapping season:

200 Gypsy moth traps

16 Japanese beetle traps

27 Khapra Beetle traps

80 Glassy-winged Sharpshooter

35 MedFly traps

6 European Pineshoot Moth traps 1 Asian Citrus Psyllid trap (GWSS) traps 6 Light Brown Apple Moth

(LBAM) Traps

PEST EXCLUSION:

Exotic pests, target pests, GWSS

Incoming plant material via truck, UPS, mail

50 shipments inspected

PEST ABATEMENT:

IBERIAN STARTHISTLE - Hand-pulled, mechanically removed, & chemically sprayed

YELLOW STARTHISTLE - Hand-pulled, biocontrol, mechanically removed & chemically sprayed

TOCALOTE - Hand-pulled, biocontrol, mechanically removed & chemically sprayed

HYDRILLA- Eradicated

SPOTTED & DIFFUSE KNAPWEED - Hand-pulled & chemically sprayed

ARUNDO DONAX - Chemically sprayed & mechanically removed

OBLONG SPURGE - Chemically sprayed & mechanically removed

BIOCONTROL:

AGENT/MECHANISM	SCOPE OF PROGRAM
Parasitic wasp <u>Encarsia</u> spp.	County wide
Parasitic Wasp Psyllaephagus bliteus	County wide
Seed Head Weevil <u>Bangasternus orientalis</u>	2 sites
Hairy Weevil Eustenopus villosus	Various sites
Peacock fly Chaetorellia australis	4 sites
