

THIRD YEAR

1. Apply 200 pounds of ammonium sulfate per acre following the first fall rain.
2. Graze in the same manner as suggested for second year.

FOURTH YEAR

1. Apply 200 pounds of ammonium sulfate and 300 pounds of single superphosphate per acre.
2. Graze in same manner as suggested for second year.

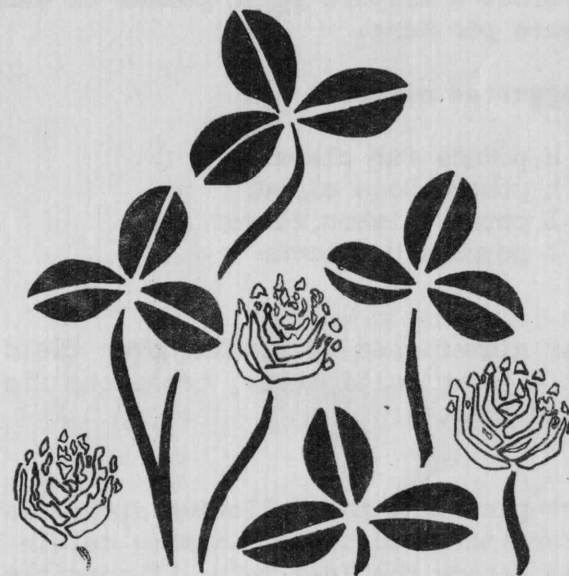

FOLLOWING YEARS

1. Every third or fourth year apply, in the fall, 300 pounds of single superphosphate per acre.
2. Apply 200 pounds of ammonium sulfate per acre each fall.

SUGGESTED PROCEDURE FOR CONVERTING

MADERA COUNTY

DRYLAND GRAIN FIELDS INTO ANNUAL CLOVER-GRASS PASTURES
