FIREARMS IN THE ANR ENVIRONMENT

I. FIREARMS IN THE ANR ENVIRONMENT

- A. This section of the University of California (UC), Agriculture and Natural Resources (ANR) Administrative Handbook addresses firearms in the ANR environment.
- B. It applies to all firearms within ANR except those associated with the [California 4-H Shooting Sports Program](#). See the [California 4-H Shooting Sports Program](#) webpage for more information regarding that Program.
- C. Virtually all other firearms in the ANR environment are associated with a [Research and Extension Center](#) (REC). Accordingly, relevant policies and procedures were designed for implementation at the RECs. Contact the [ANR Environmental Health and Safety Manager](#) for assistance with matters pertaining to firearms in any other context within ANR.
- D. ANR's detailed policies and procedures regarding firearms may be accessed at <http://ucanr.edu/sites/anrstaff/files/206183.pdf>
