

University of California Agriculture and Natural Resources

OUR MISSION: Engage the University of California with the people of California to achieve innovation in fundamental and applied research and education that supports:

- sustainable, safe, and nutritious food production and delivery
- economic success in a global economy
- a sustainable, healthy, and productive environment
- science literacy and youth development programs

UC Cooperative Extension

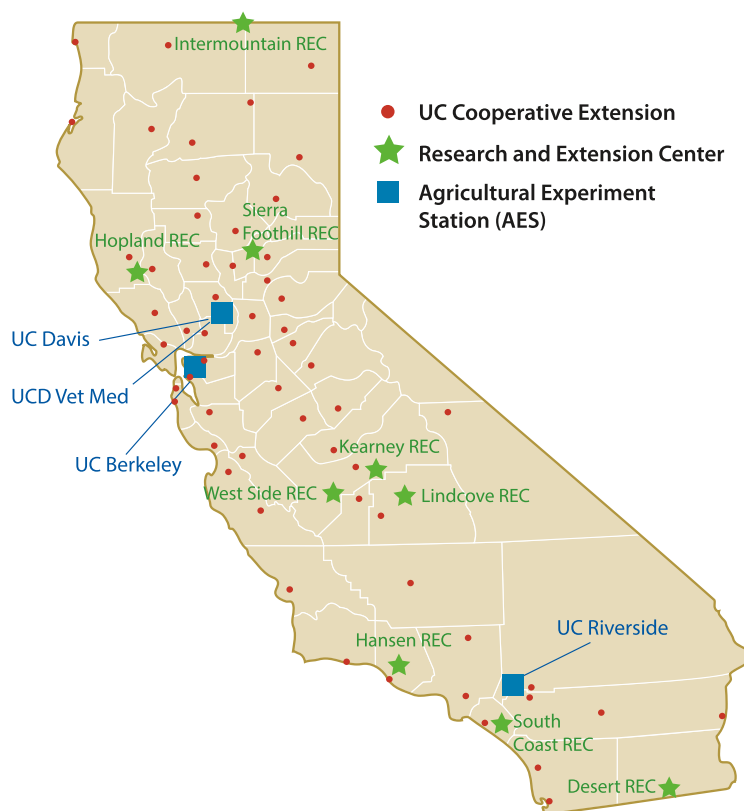

- 175 local Advisors who live, work and conduct research in the communities they serve
- 115 campus-based Specialists
- 350 Community Educators
- Programs delivered in all 58 counties

Agricultural Experiment Station

- 600+ campus-based researchers located on three campuses
- Over 1,300 research projects annually

Research and Extension Center System

- Nine locations statewide; over 12,700 acres
- Over 375 research projects annually

Enabled by the 1862 Morrill Land-Grant Act, California established the Agricultural, Mining and Mechanical Arts College which became the University of California in 1868. Federal legislation later expanded the mission of the nation's land-grant institutions to conduct research in Agricultural Experiment Stations (AES) and to connect that research with local communities throughout each state through Cooperative Extension (CE). These two divisions, AES and CE, are under the leadership of the UC system wide Division of Agriculture and Natural Resources (ANR).

Today ANR is a statewide network of UC researchers and educators who create, develop, and extend knowledge on agricultural and natural resource management, youth development, family and consumer sciences, STEM, community economic development, and more. ANR collaborates with all ten UC campuses, California State University campuses, California Community Colleges, non-profits, the private sector, and other stakeholders in all 58 counties. Overseeing 3,000 local partnership programs, for many, ANR is the public face of UC as it constantly seeks to enhance its long-standing commitment to advance the wellbeing of all Californians.
