

Successful Extension is built on relationships and trust. Here are a few tips for making connections.

## UC ANR colleagues

- Use the **UC ANR's directory** or the **Taxonomy & Personnel System (TPS)** to learn about colleagues.
- **Workgroup (WG)** Join a WG to collaboratively plan and implement research and extension activities with other Advisors, Specialists, AES, etc..
- **Program Team (PTs)**. Your workgroups can join PTs to network, share and learn across workgroups.
- **Strategic Initiatives (SI) unify, communicate and advocate** to enhance the impact of our extensive Research and Extension Network.
- **Campus colleagues**. Contact Deans, Department Chairs, Specialists and AES faculty.

## Key contacts (growers, community leaders, organizations) and workgroups.

- **Talk** to mentors and colleagues for guidance in making contacts.
- **Attend** meetings and events—county, commodity, industry. Talk to mentors and colleagues for help in prioritizing where to participate.

## UC ANR Organizations

Learn about the

- **Research Extension Centers;**
- **Statewide Programs and Institutes (California Institute for Water Resources and Nutrition Policy Institute)**
