

Publications that used data from the Garden of Eden study:

1. Busse, M.D.; Ratcliff, A.W.; Shestak, C.J.; Powers, R.F. 2000. Non-target effects of glyphosate on soil microbes. In: Proceedings, California Weed Sci. Soc. 52: 146-150. ([pdf](#))
2. Busse, M.; Rappaport, N.G.; Powers, R.F. 2000. Tolerance of soil organisms to herbicide applications in ponderosa pine plantations: Initial findings. In: Proceedings of the 21st Annual Forest Vegetation Management Conference, January 18-20, Redding, California, p. 33-38. ([pdf](#))
3. Busse, M.D.; Ratcliff, A.W.; Shestak, C.J.; Powers, R.F. 2001. Glyphosate toxicity and the effects of long-term vegetation control on soil microbial communities. ***Soil Biology and Biochemistry*** 33: 1777-1789. ([pdf](#))
4. Busse, M.D.; Rappaport, N.G.; Powers, R.F. 2001. Hexazinone effects on soil biota and processes: initial findings. p. 66-72. In: Cooper, S.L. (comp.) *Proceedings*, 22nd Ann. Forest Vegetation Management Conf. Univ. California Cooperative Exten., Redding, CA. ([pdf](#))
5. Busse, M.D.; Fiddler, G.O.; Ratcliff, A.W. 2004. Ectomycorrhizal formation in herbicide-treated soils of differing clay and organic matter content. ***Water, Air, and Soil Pollution*** 152: 23-34. ([pdf](#))
6. Hayes, J.P.; Schoenholtz, S.H.; Hartley, M.J.; Murphy, G.; Powers, R.F.; Berg, D.; Radosevich, S.R. 2005. Environmental consequences of intensively managed forest plantations in the Pacific Northwest. ***Journal of Forestry*** 103 (2): 83-87. ([pdf](#))
7. Mahoney, R.L.; Powers, R.F. 2005. Silvicultural decisions X: Is there a future for growing and processing timber in the Inland Northwest? *Woodland Notes* 15 (2): 2, 4 University of Idaho, Moscow. pp. 2, 4.
8. McFarlane, K.J. 2008. Belowground carbon storage and soil organic matter quality following herbicide and fertilizer applications in ponderosa pine plantations along a site-quality gradient in Northern California. Ph.D. Dissertation, Oregon State Univ., 179 p.
9. McFarlane, K.J.; Schoenholtz, S.H.; Powers, R.F. 2009. Plantation management intensity affects belowground carbon and nitrogen storage in Northern California. ***Soil Science Society of America Journal*** 73: 1020-1032. ([pdf](#))
10. McFarlane, K.J.; Schoenholtz, S.H.; Powers, R.F.; Perakis, S.S. 2010. Soil organic matter stability in intensively managed ponderosa pine stands in California. ***Soil Science Society of America Journal*** 74: 979-992. ([pdf](#))
11. Powers, R.F.; Ferrell, G.T.; Koerber, T.W. 1992. The Garden of Eden experiment: four-year growth of ponderosa pine plantations. p. 46-63. In: Proceedings, Thirteenth Annual Forest Vegetation Management Conference. Eureka, CA. January 1992. Forest Vegetation Management Conf., Redding, CA. ([pdf](#))
12. Powers, R.F.; Ferrell, G.T. 1995. Plantation development as constrained by moisture, nutrition, and insects: the "Garden of Eden" study. p. 92-94. In: Gaskin, R.E.; Zabkiewicz, J.A. (comp.) *Proceedings, Second International Conference on Forest Vegetation*

- Management; 20-24 March, 1995: Rotorua, New Zealand. *FRI Bull.* 192. Forest Res. Inst., Rotorua, NZ.
13. Powers, R.F.; Ferrell, G.T. 1996. Moisture, nutrient, and insect constraints on plantation growth: the “Garden of Eden” experiment. **NZ J. For. Sci.** 26: 126-144. ([pdf](#))
 14. Powers, R.F.; Ferrell, G.T. 1996. The “Garden of Eden” study revisited. Findings at eight years. p. 8-31. In: Landram, M. (comp.) *Proceedings, Seventeenth Annual Forest Vegetation Management Conference*. Redding, CA. January 1996. Forest Vegetation Management Conf., Redding, CA. ([pdf](#))
 15. Powers, R.F.; Spear, T. 1997. Weed competition and plantation management: The “Garden of Eden” experiment. p. 118-130. In: *Weed Science. In Search of Excellence*. Proc. 49th Ann. Conf. California Weed Sci. Soc., Fremont, CA.
 16. Powers, R.F. 1999. On the sustainability productivity of planted forests. **New Forests** 17: 253-306. ([pdf](#))
 17. Powers, R.F. 1999. The “Garden of Eden” experiment: assessing the potential productivity of planted ponderosa pine. p. 40-45. In: Ramsay, C. (comp.) *Vegetation Management in the Era of Threatened and Endangered Species*. Proc. 3rd Ann. PNW-IVMA Forestry and Rights-of-Way Conference. Pacific Northwest Integrated Vegetation Management Assoc., Portland, OR.
 18. Powers, R.F.; Reynolds, P.E. 1999. Ten-year responses of ponderosa pine plantations to repeated vegetation and nutrient control along an environmental gradient. **Can. J. For. Res.** 29: 1027-1038. ([pdf](#))
 19. Powers, R.F. 2000. The role of planted forests in a “green certified” century. p. 1-17. In: S.L. Cooper (comp.) *Reforestation for the New Millennium: Back to Our Roots*. Proc. 21st Forest Vegetation Management Conference. Univ. California, Cooperative Extension, Redding, CA. ([pdf](#))
 20. Powers, R.F. 2000. Balderston plantation revisited: does vegetation control or fertilization really matter? In: Fiddler, G.O. (comp.) *Progress Report 2000*. Sierra Cascade Intensive Forest Management Research Cooperative Newsletter Series Rep. No. 1. Univ. California, Davis. p. 9-15.
 21. Powers, R.F.; Reynolds, P.E. 2000. Intensive management of ponderosa pine plantations: sustainable productivity for the 21st century. **J. Sustainable Forestry** 10 (3/4): 249-255. ([pdf](#))
 22. Powers, R.F. 2001. Chapter 5. Assessing potential sustainable wood yield. p. 105-128. In: Evans, J. *The Forests Handbook*. Volume 2. Applying forest science for sustainable management. Blackwell Science Ltd., Oxford, UK. ([pdf](#))
 23. Powers, R.F. 2001. Further analyses from Balderston Plantation. In: Fiddler, G.O. (comp.) *Progress Report 2001*. Sierra Cascade Intensive Forest Management Research Cooperative Series Rep. No. 2. Univ. California, Davis. p. 8-10. ([pdf](#))

24. Powers, R.F. 2003. World trends in forests, forest use, wood supply. The irony of California forestry. The challenge to our profession. In: Cooper, S.L. (comp.) *Proceedings 24th Ann. Forest Vegetation Management Conf.* Univ. California Coop. Exten., Redding, CA. p. 1-16. ([pdf](#))
25. Powers, R.F.; Young, D.H.; Fiddler, G.O.; Spear, T.H. 2005. Balderston plantation revisited: A tale of two sites 25 years after early treatments. p. 61-72. In: Cooper, S.L. (comp.) *Where we've been, where we are, and where we're going. Proc. 25th Forest Vegetation Management Conference.* University of California, Shasta County Cooperative Extension, Redding, CA. ([pdf](#))
26. Powers, R.F.; Busse, M.D.; McFarlane, K.J.; Zhang, J.W.; Young, D.H. 2012. Long-term effects of silviculture on soil carbon storage. Does vegetation control make a difference? ***Forestry*** doi:10.1093/forestry/cps067. ([pdf](#))
27. Reynolds, P.E.; Powers, R.F. 2000. Gas exchange for managed ponderosa pine stands positioned along a climatic gradient. ***J. Sustainable Forestry*** 10 (3/4): 257-265. ([pdf](#))
28. Zhang, J.W.; Powers, R.F.; Skinner, C.N. 2010. To manage or not to manage: The role of silviculture in sequestering carbon in the specter of climate change. In: Jain, T.B.; Graham, R.T.; Sandquist, J. tech. eds. *Integrated management of carbon sequestration and biomass utilization opportunities in a changing climate*; pp 95-110. *Proceedings of the 2009 National Silviculture Workshop*, June 15-18, 2009; Boise, Idaho. RMRS-P-61. ([pdf](#))
29. Zhang, J.W.; Powers, R.F.; Oliver, W.W.; Young, D.H. 2012. Response of ponderosa pine plantations to competing vegetation control in Northern California, USA: A meta-analysis. ***Forestry*** doi:10.1093/forestry/cps054. ([pdf](#))
30. Zhang, J.W.; Oliver, W.W.; Powers, R.F. (*Ready for submission 2012*). Determining the self-thinning boundary line for ponderosa pine (*Pinus ponderosa*) grown in northern California, USA. ***Can. J. For. Res.***
