

DEPARTMENT OF WATER RESOURCES

SGM Technical Assistance Program Step-by-Step

The Department of Water Resources (DWR) collaborates with Tribes and underrepresented communities to assess Sustainable Groundwater Management Act (SGMA) implementation needs, risks, and vulnerabilities. Explore our step-by-step guide to learn more.

1 Initial Engagement with Tribe, Community, and/or Small Farmer.

REPORT SUMMARY

NEEDS

- Groundwater level monitoring
- Aquifer testing to determine long-term yield and supply
- Identifying Groundwater Dependent Ecosystems (GDEs)
- Analyze well interference
- Identify additional water supply
- Analyze existing well condition using downhole video log
- Rehabilitation of water storage tank
- Long-term water supply and demand analysis
- Assess and help to facilitate water transfers

PROPOSED ASSISTANCE

2 Initial Site Visit, Meeting and Needs Assessment with Tribe, Community, and/or Small Farmer.

3 Initial Summary Report of Site Visit/Needs Assessment and Outline of Proposed Technical Assistance to with Tribe, Community, and/or Small Farmer.

4 Technical Assistance services for the Tribe, Community, and/or Small Farmer start when agreement between all parties is reached.

5 The Tribe, Community, and/or Small Farmer has regular check in meetings with the Technical Assistance Provider, DUDEK, throughout the process.

6 Any deliverables, e.g., preliminary engineering reports, design documents, well reports, etc. will be reviewed for comment by the Tribe, Community, and/or Small Farmer. Comments will be provided to DUDEK for revisions before finalization. This process may be repeated until all deliverables are finalized.

7 Before any project is closed out, a final site visit and meeting will occur and include the Tribe, Community, and/or Small Farmer, DUDEK and DWR.
