

Pesticide Safety Instructor Training Workshops

Update your knowledge of changing regulations!

This course meets the **requirements** established by the revised 2018 Worker Protection Act which is mandated by the US Environmental Protection Agency and the California Code of Regulations of Pesticide Regulation. This workshop, presented by the UC Integrated Pest Management Program and AgSafe, will qualify participants who successfully complete the program as **fieldworkers and pesticide handlers** under these revised regulations. Topics include: pesticide exposure, signs and symptoms of illness, emergency medical care, proper use of protective equipment, safe handling and transportation of pesticides, and laws and regulations regarding labels and safety data sheets.

Who Should Attend?

- Ag supervisors • Growers • Farm Labor Contractors • Safety Managers • Safety
