Friday, June 28, 10:30AM – 12:30PM

The Union of Concerned Scientists Presents a Public Forum on

INSURANCE IN AN ERA OF CLIMATE CHANGE

Wildfires cost California hundreds of millions of dollars each year in firefighting efforts and property damage. With climate change fueling the frequency of wildfires, Californians who live in high-risk areas are facing an additional threat to the availability and affordability of their homeowners insurance.

A public forum on June 28 hosted by California State Senator Carol Liu, with a keynote address by California Insurance Commissioner Dave Jones, will examine the latest climate information about what Southern California can expect in coming years and how insurers, policymakers and consumers can work together to identify the best methods to strengthen our resilience to the impacts of climate change.

RSVP today at ucsus.org/insuranceca! Bring your questions for the Q&A section. Refreshments provided.

Hosted by California
State Senator
CAROL LIU

Featuring California
Insurance
Commissioner
DAVE JONES

Join us for this
important forum on
climate change and
wildfires, and what
they mean for your
future

Panelists will include
insurance experts,
scientists, and first
responders
