**For additional information about APEP go to [pumpefficiency.org](http://pumpefficiency.org) or call 1.800.845.6038**

California consumers are not obligated to purchase any full fee service or other service not funded by this program. This program is funded by California utility ratepayers under the auspices of the California Public Utilities Commission. The Advanced Pumping Efficiency Program has been extended through 2023 as a PG&E Customer Energy Efficiency offering, funded through the Public Purpose Programs Charge under the auspices of the California Public Utilities Commission. Please call APEP at 1.800.845.6038 or log on to [pumpefficiency.org](http://pumpefficiency.org) for current information regarding eligibility, educational seminars, and pump tests; for incentives for pump retrofits contact [AESAP](#). Eligibility extends to agricultural, large turf and municipal (including tertiary-treated water) water pumping customers with PG&E electric or natural gas accounts. Residential, commercial, industrial process, primary sewage and secondary sewage pumps are ineligible.
