

4-H Science Education Coordinator Position
University of California Cooperative Extension

Serving San Benito, Santa Cruz and Monterey Counties and housed in Hollister, this grant funded position at 45% time (18 hours per week) draws a salary of \$18.34 per hour. The position works in partnership with the Youth Development Advisor in managing applied science literacy research projects throughout the region by providing management, support, technical assistance and guidance to meet research project objectives.

The current project runs February 1, 2015 – January 31, 2016, and is a science mentoring program in cooperation with the Youth Alliance in Hollister, where high school teens are mentoring elementary students using an engineering curriculum. The main focus of this position is in coordination, logistics, organization, and mentor recruitment, not engineering content.

The position is renewable year-to-year with no guarantee of continued funding beyond any grant year. Interested candidates should contact:
