

4-H Wildlife Proficiency Program A Member's Guide

OVERVIEW

The 4-H Wildlife Proficiency program helps you learn what you need to know about your 4-H project. Your project leader will assist you in setting and achieving your goals.

There are many resources to help you learn more about your project:

- The University of California Davis has free resources available online by visiting: <http://anrcatalog.ucdavis.edu/4HYouthDevelopment/> This site lists a variety of project materials and resources recommended for use in your project.
- The Tehama County 4-H Resources and Lending Library at our county 4-H Office includes other books, videos, and reference materials that can be checked out by members and leaders.

There are five levels in the Project Proficiency Program. You may choose how many levels you wish to complete:

- ◆ Level I – “Explorer”, you begin to learn about many different aspects of wildlife.
- ◆ Level II – “Producer”, you practice and refine the many skills involved in learning about wildlife.
- ◆ Level III – “Consumer”, you become experienced in wildlife.
- ◆ Level IV – “Leader”, allows you to show your own leadership potential.
- ◆ Level V – “Researcher”, you carry out a demonstration or experiment on some aspect of wildlife, and prepare a paper or portfolio.

As you work through the proficiency program, your leader will date each skill item as you complete it. When all items in a proficiency level are completed, your leader will sign the Certificate of Achievement.

WILDLIFE
Level I - Explorer

Date
Completed

- _____ 1. Define The following terms:
- Habitat • Preservation • Birth rate • Harvest
 - Carrying capacity • Refuge • Breeding stock • Death rate
 - Conservation
- _____ 2. Know what the terms migratory and non-migratory mean. Give examples.
- _____ 3. Know how to recognize a: mammal, bird, reptile, amphibian, fish
- _____ 4. Give one example of each of the above groups.
- _____ 5. Name the five most important components of habitat.
- _____ 6. Identify some equipment that can be used for observing wildlife.
- _____ 7. Attend 80% of field trips.
- _____ 8. Give a demonstration.
- _____ 9. Bring an article about wildlife from a magazine or newspaper to the meeting.
- _____ 10. Know the name and natural history of the only marsupial found in North America.
- _____ 11. Explain the general characteristics of the deer family.
- _____ 12. Explain the difference between horns and antlers.
- _____ 13. Explain the importance of the following: Fish hatcheries, dams, fish ladders
- _____ 14. Explain the ways of studying migration in birds, mammals and fish.

WILDLIFE
Level III - Consumer

Date
Completed

1. Define the following terms:

 - Hibernation
 - Salmonid
 - Flyway
 - Endangered
 - Threatened
 - Rare
 - Anadromous
 - Aestivation
 - Raptor
2. Explain the life cycle of an anadromous fish.

3. Explain the major differences in the life cycle of a Chinook, Coho and Steel head.

4. Explain the importance of juvenile versus adult plumage in bird identification.

5. Name the major migratory waterfowl flyways found in North America.

6. Identify three specimens of waterfowl found in the Pacific Flyway.

7. Explain how wildlife benefits humans.

8. Instruct project members on equipment used for wildlife identification.

9. Organize a field trip for the project members to view wildlife.

10. Keep a record of wildlife species observed in your backyard during the time of your project.

11. Develop a reference library of wildlife sciences that may help you or other members. This may include clippings, bulletins, books, pictures, articles, etc.

12. Attend 80% of field trips.

13. Lead one meeting.
