

AAIE PRESENTS

NAPA MILDEW ROUNDTABLE 2011

Grape powdery mildew - a perennial issue but with more damage and crop loss than usual in 2010. The Association of Applied IPM Ecologists (AAIE) facilitates agricultural roundtable meetings across the state to promote progress towards outstanding pest management solutions. Come participate in the discussion with UC Davis' world renowned grape fungal researcher Doug Gubler and other industry leaders and growers. The meeting will be facilitated by PCA Laura Breyer with Breyer's Vineyard IPM Service.

The Informal Agenda of Topics will center around fungicide coverage and timing as the springboard to related issues:

- Coverage and Timing are the keys to effective control. It's not rocket science, so what happened this year?
- Mildew Pressure– it looked easy on paper.
- Materials – the new and the tried & true.
- Equipment – yours vs. the dream machines.
- Canopy Management – can you do what needs to be done without converting your crop to raisins?

Wednesday, January 12th, 2011

Sign in begins at 1:00 p.m.

We will begin on time.

1:30 p.m. to 3:00 p.m.
