

Informative Workshop on UC Davis SBX2 1 Nitrate in Groundwater Study Findings
University of California – Davis / University of California Cooperative Extension
Tulare Lake Basin

UC Davis recently released its independent study of nitrate in groundwater for the Tulare Lake Basin and Salinas Valley, as required under SBX2 1. A public workshop will be held in Parlier, CA to present the study results to local stakeholders in Fresno, Tulare, Kings, and Kern Counties.

May 3, 2012
2:00 to 4:30 PM
University of California
Kearney Agricultural Center
9240 S. Riverbend Ave.
Parlier, CA 93648
Free Event / No Registration Required / Free Parking

Background and Workshop Goals

UC Davis, under contract with the State Water Board, conducted an independent investigation and reported on the findings and potential solutions for nitrate in groundwater and drinking water in the Tulare Lake Basin and Salinas Valley.

The UC Davis Report examines sources of nitrate contamination, impacts and costs, as well as promising funding and policy options. This workshop will provide an overview of the study's findings. A panel will reflect on the problem of groundwater nitrate, safe drinking water, promising solutions, and how this report might contribute to constructive policy discussions in defining the issues and promising directions.

This workshop, hosted by the University of California, provides an opportunity to hear about the study and its findings and to also hear local perspectives on the study results.

A State Water Board workshop on May 23 in Sacramento will receive official public comment on the study and SBX2 1.

Workshop Agenda

- UC Davis SBX2 1 Study and Findings
- Panel Discussion
- Question and Answer Session

Purpose of Workshop

- Find out about the UC Davis SBX2 1 study
- Discuss findings and implications
- Engage with study authors
- Get informed before the State Water Board's May 23 hearing

Additional Information

Information about the UC Davis Study can be found at <http://groundwaternitrate.ucdavis.edu/>.

Information on the SBX2 1 Salinas Valley/Tulare Lake Basin Nitrate Pilot Studies can be found at www.waterboards.ca.gov/water_issues/programs/nitrate_project/index.shtml
