8 AM—12 PM

Session II

August 22, 2012

9 AM—2 PM

Get step-by-step instructions to

Develop your own Ranch Water Quality Plan!

Top Rangeland Specialists from the Central Coast will provide ranchers with one-on-one assistance in creating individualized Ranch Water Quality Plans.

Throughout the course, participants will learn:

- How to assess water quality concerns on your ranch
- Which management practices help reduce non-point source pollution
- How to implement holistic management practices
- What are regulations, TMDLs, prohibitions and impaired watersheds
