Getting a Grip on Drip

The ultimate 2-day design and installation experience for landscape professionals

This seminar pulls out all the stops, and will help you finally get a grip on drip. Learn how to design drip systems for new and established gardens. Spray-to-drip retrofits, and dealing with real-world challenges will be covered, as well. On the first day, after learning the basics of drip design, we'll design a system together that we will then install on the second day of the seminar.

Attend both days, or choose to just attend the first day.
You must attend the first day in order to attend the second.

Lori Palmquist
CID, CIC, CLWM, CLIA, Irrigation Designer & Partner at WaterWonk

Martin Carrion van Rijn
C-27 Landscape Contractor, Landscape Symphonies

Day 1 Classroom

When Wednesday, June 8, 8:00 am – 3:30 pm
Where Sacramento Suburban Water District, Antelope Gardens Facility
Food Morning snacks and lunch provided
Instructor Lori Palmquist, CID, CIC, CLWM, CLIA

Includes the following:
- Irrigation hydraulics
- Plant/soil/water relationship
