

UC California Naturalist Certification

FREE Training For Teachers and Community Educators

2017

June 17 -24

A UC training course exclusively adapted to support classroom teachers and community educators that are interested in building interpretive programs to highlight our coastal resources and conservation efforts. No previous experience necessary.

Learn about the unique ecology and natural history of the California Coastal Ecosystems, and have a chance to experience hands on science and conservation experts.

Preference will go to those who can demonstrate a commitment to leading public programming with diverse audiences in the year following the training.
