

UC Master Gardeners of Napa County invite you to

### Join a Citizen Science project.

There are many Citizen Science projects available for all ages. See links below for many options.

Here are two ideas for kid focused ones but there are many others listed in links provided.

Help Pollinators - BEE part of the solution, help pollinators by helping the scientists who study them.

[Great Sunflower Project](#) (based in California) teaches about pollinators and bees. Taking photos and getting ID for Birds, butterflies, insects, plants etc See our photo below of the Lemon Queen Sunflower, seeds were planted on different dates to see how fast they grow.

[Lost Ladybug Project](#) (based in New York) teaches about ladybug biology and why some are endangered.

**MANY MORE** on all kinds of topics for pollinators and beyond. Choose an animal, topic or area of science and join the fun. You'll learn about your chosen topic while helping scientists collect information for research.
