What is CropManage?

CropManage is a free online decision support tool for water and nitrogen management. Based on in-depth research and field studies conducted by the University of California, CropManage provides real-time recommendations for efficient irrigation and fertilizer applications—while maintaining or improving overall yield.

Who should participate?

Vegetable and berry growers, ranch managers, other farm staff, and technical service providers are welcome. The webinar is for both new and current CropManage users.

How to prepare?

As this is a participatory webinar, please join via computer or tablet so that you can follow along and participate in the exercises. Two screens will work better so participants can follow the webinar and use CropManage at the same time.

Each participant will need a user account for CropManage. Please set up a free user account at cropmanage.ucanr.edu before the webinar.

Continuing Education

This workshop is approved for 2.5 hours of Certified Crop Advisers (CCA) CE units.

- Nutrient Management: 1.0
- Soil & Water Management: 1.0
- Professional Development: 0.5

Contacts for More Information

Logistics & Registration: Rachel Palmer, anrprogramsupport@ucanr.edu, or 530-750-1361

Course Content: Michael Cahn, mdcahn@ucanr.edu; Farm Advisor, UCCE Monterey County
