Home gardeners often encounter unwanted pests, insects or weeds in their lawn or garden. Integrated Pest Management is a practice you can use to solve most garden pest problems while minimizing risks to people, pets and the environment. This class will provide up-to-date information on how to safely and effectively handle garden pests using IPM.

#### Objectives:

- Explain the concept of Integrated Pest Management (IPM)
- Provide tips and resources for pest identification
- Give examples of biological, cultural, and chemical controls for the home gardener
