Fruit Tree Grafting

February 24, 2024

9:00 AM – 12:00 noon

Location: General Services Administration
12200B Airport Rd
Jackson, CA

Our dormant season (late winter to early spring) is a wonderful time to expand the options in your fruit orchard. Join our instructors as they demonstrate how to graft different varieties of fruit trees to provide an abundant, varied crop.

We're back in-person this year so we will have a scion exchange. **Watch the instruction video prior to class***** and then bring some of your favorite varieties to trade with others!

Objectives:

- Learn when and how to harvest scion wood and how to store for grafting
- Understand the purpose for each type of graft
- Learn the best methods for successful grafting
- See the outcome of successful grafting

***Please view before the class "Scion Wood Saving" at <https://www.youtube.com/watch?v=EkrUKlvEmpg>
