

UCCE Master Gardeners of Amador County 2024 PUBLIC EDUCATION CLASS

FRUIT TREE PRUNING

Saturday, September 14th

9 a.m. - Noon

Location information will be provided at registration.

Late summer and early fall, after harvest, is a perfect time for pruning your fruit trees. Yes, traditional wisdom says to prune in the winter when the trees are dormant, but it can be REALLY cold then so late summer pruning could be much more comfortable. Our Master Gardener experts will provide a hands-on pruning workshop.

Class objectives:

- *Discuss why pruning fruit trees is important and what can be accomplished with effective pruning*
Provide an overview of tree selection and proper planting methods
- *Discuss when and how pruning should be done*
- *Participate in a hands-on demonstration*
- *Review safety considerations when pruning*

Attendance is limited and pre-registration is required.

NOTE: Bring a hat, water, chair and your favorite pruners!
