

 UCCE Master Gardener's of Glenn County Newsgram  
December 2019

### Monarch Way Station Planting

The Glenn County Master Gardeners received a grant consisting of milkweed and nectar plants to plant a monarch butterfly waystation. The plants were picked up on November 12, the plants were distributed to Murdoch Elementary School in Willows and Orland High School. Both of those schools have existing gardens and were interested in creating a monarch waystation.

## UCCE Master Gardener's of Glenn County Newsgram December 2019

### Master Gardener Business

No Regular Meeting on December 4

UCCE Christmas Potluck on December 11 at 12:00. MGs will have a short meeting after the potluck.

January Meeting on Jan 8 at 1:00 at Orland Office

No plant clinic on December 18, 25 or January 1.

### 2020 Master Gardener Training

There were not enough applicants from Glenn and Colusa Counties to have class. Glenn County will have 2 students that will take the Master Gardener Training in Butte County.

### Continuing Education

On Thursday January 5 UC Ag Experts are giving a webinar about the Asian Citrus Psyllid. Missy Gable Statewide Master Gardener Coordinator sent an email explaining that Asian Citrus Psyllid continues to spread through California and UC Master Gardener volunteers continue to play a critical key role in the identification and reporting of the pest to CDFA. The environmental and economic impact of the work our program is doing in this area cannot be understated. Information about registering for the webinar can be found on the poster.

#### WEBINAR UC Ag Experts Talk: **Asian Citrus Psyllid**

Presenter: Elizabeth Grafton-Cardwell  
Date: December 5, 2019 from 3 to 4:30 pm

- Asian citrus psyllid (ACP) as a vector of Huanglongbing (HLB)
- Symptoms and distribution of Huanglongbing
- Monitoring methods for Asian citrus psyllid and Huanglongbing and what to do if you think you have them
- How weather and flush affect Asian citrus psyllid populations
- What are the scientists doing about Huanglongbing?
- What should you as a homeowner be doing if you are in an HLB-infected area?

Register for the webinar at <http://bit.ly/webinarACP>
