permit #, year/rev, status (Issued, Revised, In Progress), permittee

Did You Know?

Pesticides are monitored by the U.S. EPA and must go through rigorous testing before they can be distributed. The U.S. EPA requires about 100 different scientific studies and tests from all applicants seeking to register pesticides.

Report Prepared By:

Surface Water Protection Regulation

- ◆ Proposed regulation for non-ag use of permethrins
- ◆ Will require Good Ag Practices for landscape, structural, other non-ag use to protect surface water quality
- ◆ DPR intends to develop ag use regulation in 2012

Methyl Iodide

- ◆ Registered in California 12/20/10
- ◆ Restricted material, permit required
- ◆ Must have Arysta Trained Supervision
- ◆ Buffer zones 200-800 feet up to 20 acres
- ◆ Prohibited within ½ mile of occupied school, day care, etc, while buffer zones in effect

Methyl Iodide

- ◆ Registered for preplant orchards, vineyards
- ◆ Has tree hole application-100 ft buffer zone
- ◆ Four different products registered
- ◆ Lawsuit filed to block use in CA

Bee Protection

- ◆ No Dormant Spray cutoff date in Tehama County
- ◆ Use caution if your orchard or adjacent areas have bloom
- ◆ Label restrictions
- ◆ Bee notification 934-6666 48 hours prior to insecticide application if bloom present

Dormant Spray Regulation

- ◆ Insecticides applied to dormant orchards or vineyards
- ◆ Does not apply to B.t., spinosad, or oil
- ◆ Must be able to hold runoff on site for 72 hours

Dormant Spray Regulation

- ◆ Have a written rec from licensed PCA
- ◆ 100 ft buffer to aquatic sites
- ◆ Wind speed 3 to 10 mph
- ◆ Aerial application only if bloom approaching or soil conditions prohibit ground application
- ◆ Not allowed if runoff likely due to predicted storm within 48 hours

Respiratory Protection

- ◆ In effect for three years
- ◆ Applies to employees if required to wear respiratory protection
- ◆ Written training program, medical evaluation, annual fit testing
- ◆ Voluntary respirator information
- ◆ No longer any approved enclosed cabs

Notification Regulation

- ◆ In place 1/1/10
- ◆ Existing regulation requires notification of applications to employees within $\frac{1}{4}$ mile of treated field (REI+30 days)
- ◆ Date, pesticide used, location, REI, precautions

Notification Regulation

- ◆ New regulation requires notification of other persons if operator has reason to believe they will enter field during an REI
- ◆ Not required if field is posted

Pesticide Handler

- ◆ Mix/Load, Apply, Flagger, Clean or Maintain Equipment
- ◆ Employees must be trained annually (document)
- ◆ Application specific information (use report, label, MSDS)

Pesticide Handler

- ◆ Decontamination facility within ¼ mile (soap, water, towels, clean coveralls)
- ◆ Emergency medical information at work site
- ◆ One pint eyewash immediately available if labeling requires eye protection
- ◆ Complete & post A-8 at central work location

Fieldworker

- ◆ Employee in field that has had an REI in last 30 days
- ◆ Must be trained every 5 years
- ◆ Decontamination facility within $\frac{1}{4}$ mile (soap, water, towels, clean coveralls)
- ◆ Application specific information
- ◆ Complete & post A-9 at central work location

Closed System

- ◆ Required for employees mixing, loading Category I liquids or minimal exposure pesticides
- ◆ Two approved Closed Systems being manufactured
- ◆ Can use water soluble bag, owner pour, fabricate own system (should be approved by CAC)

Read Entire Label

- ◆ Labels frequently change
- ◆ Many materials are now Federally Restricted (some insecticides, rodenticides)
- ◆ Increased PPE requirements-Chemical Resistant boots, apron
- ◆ Buffer zones
- ◆ Posting requirements
