For registration information go to: <http://ucanr.edu/2014coolseasonveggies>

For questions call (707) 253-4221

Grow your own vegetables even when days are short and nights are cold. The key is starting while weather and soil are still warm. Learn which vegetables will thrive in cooler temperatures, how to protect them from heat when they are getting started, and how to time plantings for months of harvest.
