For questions call (707) 253-4221

This workshop will introduce participants to the concept of year-round garden planning based on the school calendar. It will include many family-friendly activities that can fit into a short amount of time in the evenings or weekends to ensure a successful year-round harvest.

Demonstrations and activities: making decomposable seed pots, creating a "soilless" seed-starting medium, preparing to start crops from seed, sowing two kinds of winter veg seeds, and transplanting fall/winter crops into the garden.

Participants should bring a hat, gloves, trowel (optional), and a water bottle.
