

Arbuckle Public Utilities District

Customers

The Governor of California issued Executive Order B-29-15. This order is for water conservation for the continued drought in California. Small water districts like Arbuckle PUD have been given orders to reduce water usage by 25% compared to 2013 usage or limit outdoor irrigation to two days a week. As of May 31, we have reduced our usage to only 12% of the 2013 base usage. The State Water Resources Control Board will be monitoring our usage for the rest of the year and in December they will decide if we did or did not conserve to meet their goals. Your help is needed to meet their requirements. We do not want to go door to door and issue warnings or penalties for customers not conserving. The State can fine us up to \$10,000 a day if they feel we were not doing enough to encourage our customers to conserve water.

Thank you

Arbuckle PUD Board of Directors
