

ON-FARM IRRIGATION TRAINING

Join us for on-farm trainings led by Allan Fulton who provides coordination for the UC Cooperative Extension's differential irrigation trials in almond and walnut orchards in Tehama County. Uncertain weather patterns and variable growing conditions pose challenges and risks to growing almonds and walnuts in the Sacramento Valley. These field days will present information and technologies aimed to help manage extreme growing conditions and sustain production. Lunch will be provided and mileage reimbursement is available.

Almond Field Day - Tuesday, May 22, 2018
9am - 1pm

Topics will include: Almond production responses to deficit irrigation, experiences with aerial imagery, applying irrigation water uniformly and efficiently, chemigation to maintain high irrigation system performance, and managing soil variability.

California Almond Packers and Exporters (CAPEX)
21275 Simpson Road, Corning, CA 96021

Walnut Field Day - Thursday, June 7, 2018
9am - 1pm

Topics will include: Walnut response to when irrigation begins, demonstration use of a pressure chamber, emerging methods of detecting crop water stress, and unmanned aerial vehicles in irrigated agriculture.

Crain Ranch
10660 Bryne Avenue, Los Molinos, CA 96055

**RSVP AS SOON AS POSSIBLE AS
SEATING IS LIMITED**
