*California Animal Health
& Food Safety Laboratory System*

Youth Vet Medicine Workshop & Career Spotlight

The California Animal Health and Food Safety Laboratory System (CAHFS) is the backbone of California's warning system that helps to protect the health of California's livestock and poultry. CAHFS serves the people of California by safeguarding the public health with rapid and reliable diagnoses for animal diseases including those affecting humans. CAHFS operates in partnership with the California Department of Food and Agriculture, UC Davis, veterinarians, and livestock and poultry producers.

Visit with staff from the San Bernardino Lab, which provides livestock, equine and avian necropsy, histopathology, immunohistochemistry, bacteriology, parasitology, serology and mammalian virus detection testing on site. Milk quality/chemistry and dairy food safety testing on dairy products is available utilizing current approved methods for testing for important dairy pathogens.

Workshop topics include:

- Intro to CAHFS
- Update on virulent Newcastle Disease
- Common diseases seen at CAHFS
- Hands on activities for youth
- Careers & Technology in vet med
