

**Purpose:**

To establish a clear structure to identify, locate, group, and manage files. Maintaining this naming convention will prevent duplicate files or misplacements and will help keep files up-to-date. A standard naming convention facilitates seamless understanding and data sharing between team members and departments.

**Scope:**

This procedure applies to all departments within UC ANR when creating a Statement of Cash Collections SCCs, saving and sharing files, folders, and records.

**Statement of Cash Collection Structure (SCC):** To be followed by County, RECs, SWPR and Admin Units sending SCC documents for deposits.

All files and folders must follow the core format:

1. **Location code:** Each location has a 4 (four) letter acronym associated with the location. The acronym will clearly identify the originating department for each deposit. Using the acronym ensures all departments can easily recognize the source of each deposit.
2. **Year of deposit:** a 2-digit **FISCAL** year (YY) located after the acronym: (Should be the current fiscal year)
  - a. For example: FY 2025-2026 would be "26", FY 2026-2027 would be "27"
3. **Hyphen (-) after year:** -
  - a. (location acronym)(Fiscal year) - (XXXX)(YY)
4. **Month the SCC is created:** in number format. For every SCC created that month you will increase the last portion of the naming convention by 1. i.e.: ALAM26-0801, ALAM26-0802, ALAM26-0803, etc.

Months:

January	01	July	07
February	02	August	08
March	03	September	09
April	04	October	10
May	05	November	11
June	06	December	12

**5. File Naming Structure:**

- a. All SCCs files must follow the same format as the naming convention listed above. This naming convention will also be used on the Journal Vouchers that are turned into Financial Services.
  - i. (Location acronym)(2-digit fiscal year) – (month in numeric form)(transaction number with leading zero if necessary)  
**(XXXX)(YY)-(##)(0#)**  
*Please note the spacing. There is NO spacing between acronym and year, and no spacing between month and transaction number.*

**Correct: ALAM26-0801**

Incorrect: ALAM 26 – 08-01

Incorrect: 0801-ALAM202

Incorrect: ALAM260801

Incorrect: ALAM26-AUG01

**Journal Voucher Structure (JV): To be followed by the financial staff who are creating the JVs that will be submitted to Financial Services from the SCC documents.**

Sample JV document

**ORACLE Journal** Financial Services Data Entered

\* Required \* This field is required  
If any rows in the worksheet have a Journal Entry Status, none of the rows are locked to U. Enter the date.

Date: 2025 Primary Ledger:  Group ID:  Source:  System:

Journal Description:  Reversal Period:  Reference Date:

Account Number:  Journal Validation Status:

Journal Lines

**We will ask FS to enter the date the JV is entered into Aggie Enterprise** →

**Each Line will be reviewed by a BP or Supervisor and then Initialed before sent to Financial Services** →

**Description should be 'type' and then the week end date - Example - Income 9-5-25** →

- There will be 3 types of JVs each week. **DO NOT** combine types. \*Exception would be if an SCC has two types, then you can put it on one JV type.
- There will be 3 Folders for each type so that the backup goes with each JV document.
- Double checks must be completed by 10 am on Friday and completed JV documents should be in the Financial Services BOX folder by EOD Friday. Business Partner (BP) should be double checking the lines and Supervisors as backup.
- There in no change in how we manage Gifts/Donations.
- Back-up from initiators should be labeled with the same information from the reference number box on the SCC document. (see page 1 for more details)

#### Types of JVs

- Income
  - Reimbursements
  - CashNet – Will be in the Income folder
- Path:** Box JV > For Financial Services > Weekly Folder

All files submitted should be labeled with the Naming Convention. The deposit file backup needs to be saved as the Statement of Cash Collections SCCs number as well.

For example, inside folder, it should look like this:

The journal entry file is referencing all 3 SCCs (please note 0801-03), meaning SCC 01 through 03.

**Implementation:**

All new files must use the naming conventions **starting September 01, 2025**.
