Project Scientist with the California Institute for Water Resources (CIWR)
(Project Scientist, Assistant-Associate Rank-Represented)

Position Overview

Location: UC ANR Second Street Building, Davis, CA

The University of California Division of Agriculture and Natural Resources (UC ANR) offers a unique recruitment opportunity for a Project Scientist with the California Institute for Water Resources (CIWR) to conduct research and communications in CIWR. UC ANR coordinates a statewide network of researchers and educators in partnership with Counties that are dedicated to the development and application of knowledge to address local agricultural, environmental, youth, and health issues. Over 200 UC ANR UCCE academics conduct research, outreach and education from locally based Cooperative Extension offices in over 70 locations. Our mission is to bring the University of California directly to Californians through research, extension, and education programs that support:

- Sustainable, safe, and nutritious food production and delivery
- Economic success in a global economy
- A sustainable, healthy, and productive environment
- Science literacy and youth development

By working and living among those we serve, UC ANR expands the University of California’s reach to engage all people and communities in California, ensuring equal access to the UC system.

Introduction:

The California Institute for Water Resources (CIWR) is a statewide program located within UC ANR. CIWR is based in Davis, CA, and has staff throughout the state of California. CIWR conducts research on sustainable water resources management for urban, environmental, and agricultural systems. CIWR is a member of the National Institutes for Water Resources and serves as a hub of water research in California. CIWR supports water research projects throughout the state, conducts research on urban and water resources management, runs extension programs to improve water and agricultural practices, and supports public education and outreach through a strong online presence.

Purpose:

The Project Scientist will lead and support applied research and communications in CIWR through job duties that capitalize on the Project Scientist's expertise and interests. Applied research and communications are two core missions of CIWR. CIWR’s applied research program supports collaborations with partners on topics of water resource management, drinking water and wastewater access, and irrigation and nutrient management.
CIWR’s communications program supports public education, outreach, and joint activities with campus partners across the state. The Project Scientist will develop job duties in one or more areas of interest that further CIWR’s research and extension programs, promote CIWR with internal and external audiences, and manage projects. The Project Scientist will work closely with CIWR staff and collaborators in developing a set of duties that further CIWR’s role as a hub for applied water research in the state.

The Project Scientist will:
- Provide analysis, management, and administration of CIWR’s applied research projects in collaboration with colleagues in UC ANR and California's universities.
- Conduct research in one or more areas of interest that support CIWR’s mission.
- Undertake communications and outreach with one or more audiences of university extension related to water management and climate science.
- Work with campus and external partners to build long-term collaboration opportunities for joint projects and programs with an extension focus.
- Promote CIWR with internal and external audiences.
- Promote a collegial and collaborative environment in CIWR.
- Support development of proposals.

**Major Duties and Responsibilities:**

**Research Program Management (60%):**
- Lead and support applied research in water management and drinking water that employ interdisciplinary research methods and modeling approaches,
- Initiate and scope collaborative research with collaborators across university faculty, staff, students, and state and regional water agency professionals.
- Draft written reports of research methods and results to be developed into scientific journal articles and extension publications.
- Contribute to proposal development.

**Research Communications and Outreach (20%):**
- Support research communications focused on outreach to one or more extension audiences, such as communities, media, and agency and industry partners.
- Support and manage outreach with campus partners to promote collaborative projects and programs.
- Coordinate discussions with agencies and communities related to projects.
- Prepare and conduct presentations.
- Participate in planning outreach and extension efforts to address research needs.
- Participate in conferences and workshops.
- Support development of summary products and annual reports.

**Grant and Contract Development (20%):**
- Work with CIWR colleagues and collaborators in UC ANR, UC, and CSU research groups in seeking out opportunities for new funding and developing new projects.
- Support or lead grant and contracts.

**Reporting Relationship:** The Project Scientist will report to the Director for the California Institute of Water Resources.
Qualifications and Skills Required

Required Qualifications:

**Education**: A minimum of a Ph.D. degree in water resources engineering, environmental engineering, hydrology, environmental science or studies or a related field is required at the time of appointment.

**Additional Requirements**
- Demonstrated research experience through a combination of professional experience in one or more previous positions, utilizing the techniques or methods required by the position and demonstrating technical managerial knowledge.
- Experience in aspects of initiating and/or managing academic research and extension programs or projects.
- Interest in supporting or leading applied research projects with staff, colleagues, and students
- Interest in or experience with outreach, communications, and engagement of research to diverse audiences
- Ability to work independently and seek guidance when needed, demonstrated through academic research, professional experience, or a combination.
- Excellent verbal, written, and interpersonal communication skills and presentation skills.
- Excellent time management and organizational skills to manage multiple projects simultaneously.
- Ability and means to travel on a flexible schedule as needed, proof of liability and property damage insurance on vehicle used is required. Must possess a valid California Driver’s License to drive a County or University Vehicle.
- This is not a remote position. The candidate must be available to work onsite. In accordance with UC ANR Flexible Work Guidelines flexible work agreements are available upon approval by supervisors and periodic re-evaluation.

**Desired Experience**
- Prior experience in water resources policy and management.
- Familiarity with multidisciplinary research including both methods from natural sciences, engineering, and social sciences.
- Experience with financial and personnel management.
- Proficiency in a programming language such as R, Python, or Julia.

**Skills Required:** To be successful, the Project Scientist requires skills in the following:

**Technical Competence and Impact**
- Interact with collaborating researchers to achieve project objectives.
- Collect and analyze data for agency reporting and publications. Participate in extension education and outreach activities.

**Communication**
- Demonstrated excellence in written, oral, interpersonal and information technology communication skills.
- Skills to communicate and extend technical information to diverse audiences are required.
- Participation in professional societies and conferences and ability to give presentations at seminars and continuing education functions.

**Collaboration, Teamwork and Flexibility**
- Demonstrated ability to work collaboratively as a team member with others.
- Able to adapt as circumstances warranted.
- Promote diversity, equity and inclusion.
Lifelong Learning
Demonstrated commitment to ongoing self-improvement.

About UC ANR
The University of California, Division of Agriculture and Natural Resources (UC ANR) consists of a network of scientists and educators working in partnership across the state of California. We are committed to developing and supporting healthy food systems, healthy environments, healthy communities, and healthy Californians. UC ANR administers Statewide Programs and Initiatives (SWP/I’s) that focus research and extension on solving priority problems that engage ANR academics and UC faculty in integrated teams to work on complex issues requiring trans-disciplinary approaches; as well as UC Cooperative Extension (UCCE), which is responsible for program development and delivery in counties throughout the state.
