Varieties**  
Page 13

A black and white photograph showing a heavy-duty agricultural drill machine in operation on a dry, rocky, and sparsely vegetated hillside. The machine is a two-wheeled tractor with a large, complex drill assembly at the rear, which is being used to place seeds into the ground. A person is visible operating the machine. The terrain is uneven and appears to be a range or pasture.

**Heavy Duty Drill for Seed Placement on Ranges . . Page 5**
