Chapter 7A of the California Building Code - Materials and Construction Methods for Exterior Wildfire Exposure - was approved by the Building Standards Commission in 9/2005. This new chapter of the code applies to new construction in Wildland Urban Interface (WUI) areas. It will establish minimum standards for the protection of life and property by increasing the ability of a building to resist intrusion of flame and burning embers.

This course will:

- Provide information on the mapping of Fire Hazard Severity Zones (FHSZ)
- Provide information on the State Fire Marshal standards that apply to Chapter 7A, and other information on testing requirements and acceptance criteria for exterior-use building materials.
- Provide information on the State Fire Marshal Building Materials Listing (BML) program that provides a procedure for testing, labeling, and listing products that comply for use.
- Topic areas covered include how buildings are exposed to wildfire, applicability and implementation, roof coverings and assemblies, gutters, vents, related test procedures, eaves, exterior walls, windows, decking, doors, projections, and other buildings on the parcel (other than primary).

The University of California prohibits discrimination or harassment of any person in any of its programs or activities. (Complete nondiscrimination policy statement can be found at http://danr.ucop.edu/aa/danr_nondiscrimination_and_affir.htm) Direct inquiries regarding the University's nondiscrimination policies to the Affirmative Action Director, University of California, ANR, 1111 Franklin St., 6th Floor, Oakland, CA 94607, (510) 987-0096.

Should you need assistance or require accommodations for any physical challenge, please let us know.

Designed For:

- Building Officials
- Fire Officials
- Planners
- Building materials manufacturers
- Developers
- Architects Engineers
