

Mark graduated with a B.S. in Agronomy from Colorado State University and an M.S. in Hydrologic Sciences from UC Davis. He subsequently spent two years at the Institute of Sustainable Agriculture in Cordoba, Spain as a Fulbright scholar. Mark began his UCCE career in 2001 as the Viticulture Farm Advisor for San Luis Obispo and Santa Barbara Counties, and in 2018 his title shifted to Water Management and Biometeorology Advisor. He works on a variety of water- and weather-related issues for the region, reflecting the importance of these topics for local agriculture.
