THERE'S NEVER BEEN A BETTER TIME FOR A TUNE-UP

Agricultural producers with **one or more acres of planted, irrigated agricultural material** can now receive **up to \$550 per acre or \$5,000 per property** to help cover the cost of irrigation upgrades.

ELIGIBLE PROPERTIES MUST:

- Have one or more acres of planted, irrigated agricultural material
- Complete a full, free irrigation system evaluation conducted by Mission Resource Conservation District

Program Partners:

COUNTY OF SAN DIEGO
WATERSCAPE
REBATE PROGRAM

BENEFITS:

Save on your water costs.

An efficient irrigation system provides crops with the required amount of water at the correct time. This helps avoid costly overwatering – and when you have acres of crops, the savings will add up quickly.

Identify problems before they occur.

When an expert takes a look at your irrigation system, you can be confident they'll catch any problems in the making – before they make problems for your bank account.
