Project WET Online Training Directions – Environmental Educator Certification Program

Begin the training at this link: https://online-training.projectwet.org/guide-training-modular. Please list 'Brian Brown' as the Coordinator and contact him if you run into any problems at projectwet@watereducation.org
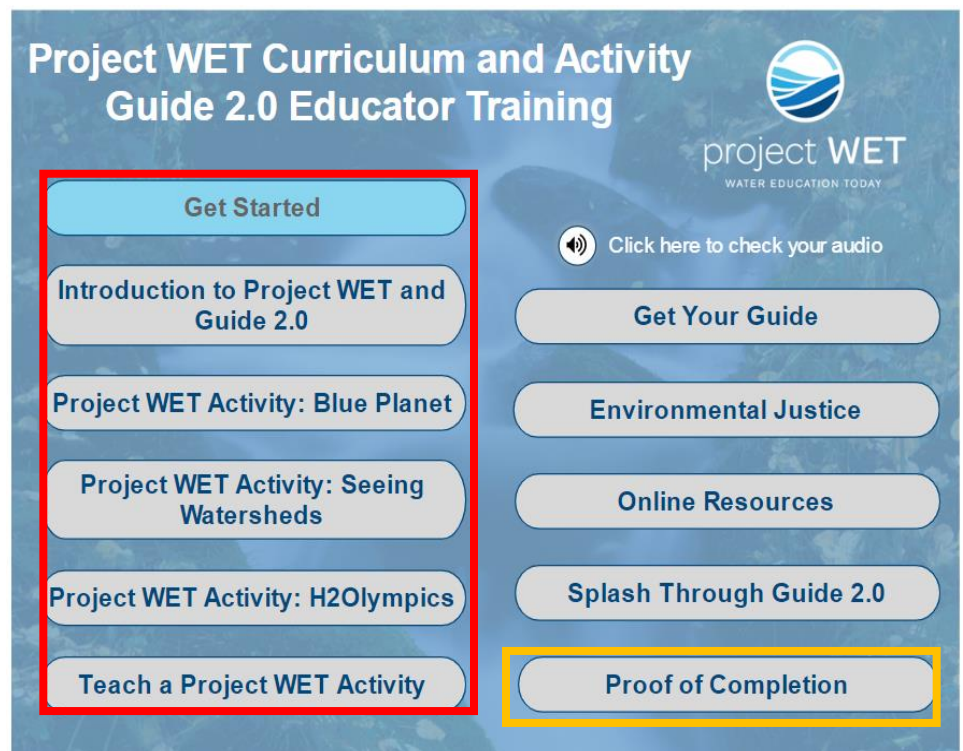

Once you complete the **'Get Started'** section, you can use the Menu tab on the left to jump to any portion of the training. You can leave the training and return to where you left off as often as you need to complete it - so long as you use the same computer to access the training. It usually takes participants @ 2 – 2.5 hours to complete the training sections for this workshop, highlighted by the red squares in the screenshot below.

The first 3 activities are interactive tutorials. We are just asking you to review the activities in the 'Teach a Project WET Activity' section – **YOU DO NOT NEED TO TEACH AN ACTIVITY!**

Please explore all the activities you'll experience with the following questions in mind:

- What grade levels might you use each activity or a part of each activity?

- What school subject area connections do you see in each activity?

- How could the concepts & skills in each activity be applied to study your local area or region?

Once you finish the training sections in red in the image, please click **'Proof of Completion'** shown in gold to receive a digital certificate showing the sections you completed.

Send a copy or screen shot of your proof of completion to Brian Brown at projectwet@watereducation.org by Monday, October 3, 2022 to receive your Project WET guide in part 2 of the workshop on Friday, October 7th at the California Naturalist conference.
