#21560 “Compatible Produce for Seven-Day Storage (poster & temp/code signs)”

\$7.50

Authors: Thompson, J., A. Kader, and K. Sylva, 1996 - poster

Description: The best storage environment for an individual fruit or vegetable depends on its unique requirements for temperature, relative humidity, and ethylene exposure. Most compatibility charts for mixing products during postharvest handling divide fruits and vegetables into eight groups. This 22 X 28 inch poster has developed a three-groups chart that is easy to use. It also comes with a separate packet including instructions and temperature code signs.
