

Targeted Grazing Field Day

This tour is designed for land managers and owners looking to start utilizing grazing to reduce fire fuels or improve their current grazing program in mixed-conifer forests. This interactive field tour will look at management treatments at UC's Blodgett Forest Research Station.

- **Grazing to reduce fuels and improve land**
- **Creating a targeted grazing plan**
- **Selecting a targeted grazer**
- **Tools to monitoring grazing effectiveness**
- **Case Study Site Visits:**
 - **Sheep and goat grazing post fire**
 - **Goat grazing in forestry replanting**
 - **Goat grazing to reduce fire fuels**

July 30th

10 am – 3:30 pm

UC Blodgett

Forest Research Station

Georgetown, CA 95634

\$10 includes lunch and materials
