SOIL HEALTH GRAZING WORKSHOP
Saturday, October 25th
9:00 Am – Noon
Robinson’s Ranch, Penn Valley, CA
Corner of Spenceville Rd and Indian Spring Rd

Soils form the foundation for growing forage and raising livestock. Gain knowledge about life in the soil and how your grazing management can enhance the productivity of your soil.

Learn About Soils Health on Grazing Lands

Get Your Hands Dirty!

• Learn how to determine Soil Texture
• Learn to Estimate Soil Moisture by Feel
• Estimate Surface Cover
• Hunt for Earthworms and Dung Beetles

Bring a sample of your soil to the workshop!

To register, contact Roger Ingram at rsingram@ucanr.edu or 530-889-7385

Healthy soil has amazing water-retention capacity. Every 1% increase in organic matter results in as much as 25,000 gallons of available soil water per acre.

All of the soil microbes in 1 acre/foot of soil weigh more than 2 cows.
