

Retail Sources of Red Delta Traps and Pheromone Lures for Male Vine Mealybugs (*Planococcus ficus*) and European Grapevine Moth (*Lobesia botrana*)

Rhonda Smith
Viticulture Farm Advisor
UC Cooperative Extension
Sonoma County

March 2020

(Available online: <http://cesonoma.ucanr.edu/files/309967.pdf>)

The names and companies provided do not constitute an endorsement or recommendation by University of California Cooperative Extension. This list is not complete. There are other suppliers of traps and lures. We have tried to be as accurate as possible but quantities available may vary from those cited. When available, select traps which are white on the inside because they are easier to read.

Lures should be stored in the refrigerator or freezer. Check with the manufacturer to learn lure maximum field life. Traps are attached to the trellis wire by twist ties.
