

Irrigation Sensors Focus Group

*with Crystele Leauthaud,
UCCE Agroecology & Water Specialist*

Join us to help guide the development of build-it-yourself water sensors for sustainable irrigation management on agroecological farms. We will discuss your interest in DIY sensor technology tailored to your farms' needs. This is a hands-on participatory event designed for small & mid-scale specialty crop growers. Learn from local GSA partners CAFF & Sonoma RCD about technical assistance available to small farms navigating SGMA and a free well-monitoring program!

West County Community Farm

October 9th, 2024

2:00pm-5:00pm - English Language Group
