

University of California Integrated Pest Management Insect Update #14
Tehama County 6/18/12

INSECT	FIRST BIOFIX	SECOND BIOFIX	THIRD BIOFIX	FOURTH BIOFIX	ACTIVITY MOTHS/DAY	AVG. DEG. DAYS/DAY	DAY DEGREES FROM BIOFIX
CODLING MOTH	4/19	-	-	-	.33	30.7	1107
ORIENTAL FRUIT MOTH	2/23	5/11	-	-	.1	36.3	927
PEACH TWIG BORER	4/23	-	-	-	3.2	30.7	1021
NAVEL ORANGE WORM	5/3	-	-	-	0	27.3	701
SAN JOSE SCALE	4/16	-	-	-	-	20.7	1068

Codling moth DD are at 1107 following the 4/19 biofix. For the Ashley walnuts that we monitor in the cone grove area of the county we have not observed trap increases yet so have not seen the start of the second flight in that orchard.

It's early, but our Walnut Husk Fly traps have caught our first female without eggs on 6/15 and a single male on 6/18 in mature Hartley in the Dairyville area of Tehama County. It's not too soon to get WHF traps up and watch for females with eggs.

Additional Pest management information is available at the UC IPM website including a day degree calculator and twilight temperature data. <http://www.ipm.ucdavis.edu>.
