

University of California Integrated Pest Management Insect Update #16
Tehama County 7/2/12

INSECT	FIRST BIOFIX	SECOND BIOFIX	THIRD BIOFIX	FOURTH BIOFIX	ACTIVITY MOTHS/DAY	AVG. DEG. DAYS/DAY	DAY DEGREES FROM BIOFIX
CODLING MOTH	4/19	6/27	-	-	2.2	23.8	119
ORIENTAL FRUIT MOTH	2/23	5/11	6/25	-	5.0	29.0	193
PEACH TWIG BORER	4/23	7/2	-	-	7.4	23.8	0
NAVEL ORANGE WORM	5/3	-	-	-	0	19.2	945
SAN JOSE SCALE	4/16	-	-	-	-	20.8	1323

Codling moth DD are at 119 following the 6/26 second biofix. Compared to other orchards this might be a little late but at this site trap catches did not increase until 6/27.

Walnut husk fly catches have been erratic and no eggs yet in the females so we continue to count traps twice per week and watch for eggs.

Additional Pest management information is available at the UC IPM website including a day degree calculator and twilight temperature data. <http://www.ipm.ucdavis.edu>.
