SAN JOSE SCALE	4/16	-	-	-	-	16.0	2833

Codling moth DD are at 658 following the 8/9/12 third biofix .

Our NOW egg traps in Almond had egg laying on 8/31. Our initial prediction was for 8/25 so fairly close. Notice the third biofix 8/31.

The Dairyville Hartley orchard that we monitor for Walnut Husk Fly (WHF) was sprayed for WHF a fourth time on 8/29. Watch traps carefully to decide if additional applications are necessary.

Additional Pest management information is available at the UC IPM website including a day degree calculator. <http://www.ipm.ucdavis.edu>.
