

University of California Integrated Pest Management Insect Update #17
Tehama County 7/1/13

INSECT	FIRST BIOFIX	SECOND BIOFIX	THIRD BIOFIX	FOURTH BIOFIX	ACTIVITY MOTHS/DAY	AVG. DEG. DAYS/DAY	DAY DEGREES FROM BIOFIX
CODLING MOTH	4/8	6/3	-	-	4.0	31.3	625
ORIENTAL FRUIT MOTH	3/4	5/6	6/13	-	3.1	37.3	526
PEACH TWIG BORER	4/1	6/3	-	-	10.4	31.3	625
NAVEL ORANGE WORM	4/11	6/17	-	-	1.1	28.3	267
SAN JOSE SCALE	3/25	-	-	-	-	31.0	1620

Codling Moth are at 625 DD from the 6/3 biofix in the Ashley walnuts we monitor. The next event should be the third biofix in about 14 days.

We are seeing consistent NOW egg laying on the four egg traps that we monitor in almond. Keep an eye on that pest.

We are catching a few Walnut Husk Flies and one female with no eggs on 7/1. So be sure to get traps up soon.

Additional Pest management information plus twilight temperatures are available at the UC IPM website including a day degree calculator. <http://www.ipm.ucdavis.edu>.
