Codling moth are currently at 168 Degree days by our temperature sensor / Degree Day calculator (Harvest Guard) located in an almond orchard close to Red Bluff on Highway 99 E. Notice the second codling moth biofix on 6/9 with good flight activity 6/16.

We caught our first walnut Husk Fly 6/9/14 in Hartley and a second on 6/16. Both females without eggs. If you plan to monitor WHF it would be a good time to get traps up.

Third biofix for OFM on 6/12

Additional Pest management information plus twilight temperatures are available at the UC IPM website including a day degree calculator. <http://www.ipm.ucdavis.edu>.
