Double sided sticky tape monitoring in Howard and Chandler near Red Bluff indicates second walnut scale crawlers started on 8/10/15 and as of 8/31/15 we are catching .21 crawlers per centimeter per day.

In reviewing our egg trap data for almond it looks like the third NOW biofix occurred earlier than predicted on 7/6 at 708 DD. We set the fourth biofix on 7/30 and are currently at 994 DD.
