

UC ANR is currently recruiting for a Senior Farm Machinery Mechanic for the Intermountain Research & Extension Center located in Tulelake, CA, Job Number 27377. Under the direction of the Center Superintendent of Agriculture (CSA), the Senior Farm Machinery Mechanic maintains 28,000 square feet of buildings, including specialized HVAC systems used in a computerized potato research storage facility and a custom fabricated potato research grading and sizing facility. This position also oversees the maintenance of more than 50 pieces of equipment, including agricultural tractors, specialized research planting and harvesting equipment, and a fleet of vehicles ranging from a car to 2 ½ ton cargo trucks. This position provides field equipment operation of complex farm machinery, and skilled and specialized cultural practices used to produce the agricultural research crops grown at the Center. Maintain pesticide and fertilizer application equipment to ensure a consistent, accurate and uniform application and calibrate all types of application methods. Setup and operate various types of agricultural equipment ranging from small walk behind power units to large track layers or wheel tractors, harvesters, discs, harrows, landplanes, planters, mulchers, incorporators, ridgers and swathers.
